Lieselotteweg am Männlichen

Was für ein Tag!
Saftige Wiesen, singende Alphörner, Kuhglocken und freche Murmeltiere... mittendrin Lieselotte und ihre Freunde. Bei soviel Spiel und Spass macht das Wandern besonders Freude! Doch was wird Lieselotte wohl am besten gefallen?

Folge den 13 Posten auf der Karte und erfahre, was Lieselotte niemals vergessen wird. Gib gut Acht, an jedem Posten ist eine Buchstabenzange versteckt. Den ersten Posten findest du gleich hier in der Talstation. Halte Ausschau nach unserer gefleckten Freundin, steht sie vielleicht hinter dir?

Einfach die Zange an das richtige Buchstabenfeld links auf der Karte ansetzen und leicht drücken. Wenn das Lösungswort vollständig ist, lege die Karte an der Kasse der Talstation vor und erhalte eine kleine Überraschung.

Auf geht's!

Infos zum Männlichen

- Bergstation 2225 m ü.M
- Reine Wanderzeit: 1.5 h
- 2 Brätelplätze mit Holz

Weg nur teilweise für Kinderwagen geeignet!

Lieselotte reist in die Schweiz

Wenn der Postbote im Winterurlaub ist, dann muss auch die Postkuh Lieselotte nicht arbeiten. Und die Bäuerin fährt alle paar Tage ins Dorf, um die Post für den Bauernhof abzuholen. Als sie heute aus dem Dorf zurück kommt, läuft die Bäuerin gleich aufgeregt in den Kuhstall: «Schau einmal, Lieselotte, der Postbote hat dir eine Karte aus seinem Ski-Urlaub geschrieben!»

Lieselotte schaut sich überrascht das Foto auf der Postkarte an. So etwas hat sie ja noch nie gesehen: So hohe Berge! Und so viel Schnee! Allerdings ist Lieselotte bisher noch nie Ski gelaufen. Ob das mit vier Beinen überhaupt geht?

«Das sieht dort bestimmt auch im Sommer sehr hübsch aus...» meint die Bäuerin verträumt. «Lauter saftige, grüne Weiden voller Blumen... von überall her der Klang von Kuhglocken...».

Die Bäuerin dreht sich um und ist verwundert: «Warum packst du denn deinen Rucksack, Lieselotte?»

Lieselotte trail on Männlichen

What a day!

Lush meadows, singing alphorns, cowbells and cheeky marmots ... and in the midst of it all Lieselotte with her friends. With so much fun and games hiking becomes a particular delight! But what will Lieselotte probably like the best? Follow the 13 stations on the map and see what Lieselotte will never forget. Take special care, letter punches are hidden at each of the stations. You can find the first one right here at the valley station. Look for our 4-legged friend, she might be standing right behind you. Simply hold the letter punch to the correct letter box on the left of the map and press lightly. When the solution word is complete, show your map at the valley station and receive a little surprise! Here we go!

Information on Männlichen

- Summit station: 2,225 m above sea level
- Net hiking time: 1.5 hrs
- 2 barbecue sites with wood provided

Trail only partially suitable for prams!

Even more fun with Lieselotte can be found at: www.kuh-lieselotte.de with information on her books, audio books, games and a lot of extras! You can also find a collection of these at the gondola valley station.

GRINDELWALD

SAUERLÄNDER

Lieselotte is travelling to Switzerland

When the postman is on winter holiday, then the post cow Lieselotte does not need to work either. So the farmer's wife goes into the village every few days to pick up the mail for the farm. Upon returning from the village today, the farmer's wife excitedly runs into the cowshed, "Look, Lieselotte, the postman has written you a card from his ski trip!" Lieselotte is looking at the photo on the postcard with surprise – there is something she has never seen before: such high mountains! And so much snow! However, Lieselotte has so far never been skiing and wonders, whether that would even be possible with four legs. "This looks like it is certainly very pretty also in summer..." the farmer's wife dreamily says. "Nothing but juicy, green meadows full of flowers ... and the sound of cow bells from miles around." The farmer's wife turns around and is surprised: "Why are you packing your backpack, Lieselotte?"

1 Gondel - Gondola

Actually Lieselotte would have liked to climb Männlichen just like the local cows, but as a lowland's cow such a climb is a bit too burdensome for her. So today the Männlichen cableway is making an exception for Lieselotte, by allowing a cow to also board a gondola.

The Männlichen gondola cableway has been taking visitors up to the summit station 1,288 metres above Grindelwald Grund for almost 40 years. The Grindelwald-Männlichen gondola cableway was built in 1978 and was the world's longest at that time! This record has, however, since been broken by several newer cableways. Meanwhile, the Männlichen cableway has given years of faithful service and will soon be newly built, so that cows and other vacationing mountain adventurers can travel up Männlichen faster and more easily in the near future. Therefore enjoy the ride with Lieselotte in this 'vintage' gondola while you can. Do you see the lush pastures, which are home to the Grindelwald cows, and behind them the mighty Eiger north face?

2 Start - Welcome to Männlichen

Lieselotte the cow has heard a lot about Grindelwald. For a long time she has wanted to see the high mountains with her own eyes and get to know the animals that live here. Join Lieselotte and the chickens on their mountain adventure. You can get both the ticket and the Lieselotte hiking map right next door at the ticket counter. Set out in search for rock crystal, practice your first sounds on a real alphorn, try your hand in the 'cow milking competition' or survey the famous Eiger north face like the real alpinists. At two barbecue sites you may also make a fire and grill sausages or campfire bread. The actual hiking time to Holenstein intermediate station is approximately 1.5 hours. However, with so many games and fun things to do, any efforts of hiking are quickly forgotten. And after an exciting day on Männlichen, you can experience many more adventures with Lieselotte. Discover Lieselotte's colourful world with lots of extras at www.kuh-liieselotte.de. All books featuring Lieselotte can be found at www.fischerverlage.de. Would you like to know what Lieselotte finds the most impressive about Männlichen? Then place box 1 of your map between the belt strap and get the first solution letter!

3 Los gehts - Let's go

For now though, enough with the playing and sliding: let's hike! Lieselotte is already waiting excitedly to experience new adventures. But before starting your hike you still need to place your map between the belt strap in box 2. This gets you a further solution letter.

4 Alpaufzug - Procession to the pastures

In the bend, four cows are coming towards Lieselotte. She is delighted to hear their splendid sounding bells. These bells help the cows with orientation: they will always know where the other animals in the herd are. Moreover, it makes it easier for the cowherd to find stray animals. It is customary that the herd's leading cow carries a larger bell than the others. Before you move on, punch box 3!

6 Speichersee - Water reservoir

In this reservoir, the people from the cableway collect water in order to be able to generate snow for the ski slopes in winter. Now, in the summer, the reservoir is refilled. "Perfect for a little refreshment," Lieselotte tells herself and jumps into the water with an old tractor tire as floatation ring. Actually, swimming is not allowed here, but for Lieselotte we shall turn a blind eye this time... Lieselotte has become thirsty from all the legwork. Good thing there is a drinking trough here. Why don't you give the water from the tap a try yourself? Can you feel how cold it is? The reason being that the water comes directly from a spring. It is very clean and drinkable.

Did you know that a cow needs to drink about 4-5 litres of water to

give one litre of milk? Would you like to try your hand at milking? Lieselotte's new friends Dorli, Berta and Klara are already waiting. And here you can punch box 4.

7 Wetterunterstand - Weather shelter

Lieselotte is amazed at how quickly the weather can change here. If the clouds are black and the mountain peaks suddenly shrouded there might soon be a storm, heavy rain or thunder and lightning. Then one is really glad about a safe retreat. This can be vital, especially for climbers or mountaineers. It offers protection if they get caught in a thunderstorm. Inside some of the climbers' equipment hangs on the wall. Do you know why it is all needed? Before you move on, punch box 5!

8 Eigerblick - Eiger view

In nice weather you have a good view of the Eiger north face from here. Lieselotte wonders why there are such high mountains here and not where she lives. It can be difficult to imagine, but 200 million years ago there was a big ocean that also covered this place. That is why you sometimes find fossils of shells and corals up here. 100 million years ago this rock was pushed together and folded by the movement of tectonic plates. The chickens have fluttered onto the climbing column and are looking a bit like bold mountaineers climbing the Eiger north face. Lieselotte must of course take a photo of that. Punch box 6!

9 Murmeliturm - Marmot tower

Do you see the towers of the cable car? Marmots particularly like to rest on their warm concrete foundations. With a telescope you can get a much better view of the animals. Best be quiet, marmots have very good hearing and eyesight. If danger approaches, they whistle and disappear very quickly into their burrows. Before autumn, the marmots have to eat a lot to become fat, so they will not get hungry during their long hibernation. During the cold season, the marmots then cuddle closely together in their burrows and sleep for six months. Here the punch nibbles at box 7!

10 Picknickplatz - Picnic area

A good time for a break! The creek and soft mossy ground make this place perfect for a rest. "Finally a break!", Lieselotte thinks and contently trots to the picnic spot. After you have rested up, you can venture on a treasure hunt. The chickens have heard of a mysterious mountain treasure that is supposed to be hidden here in the woods. If you follow the instructions of the local forest animals, you might be able to find it. First you have to locate the rabbit sitting not far from the fireplace in the forest – it has the first clue. Punch box 8 here.

11 Toilette - Toilet facilities

Cows also need to do 'number ones and twos', which you have probably already noticed when spotting cow dung along the way. However, Lieselotte prefers to use proper toilets.

12 Weitsprung - Long jump

Here some local mountain animals are competing in the long jump. A frog, a squirrel, a rabbit and a fox are showing off their skills. The frog can manage at least 50 cm. But the best jumper is the fox. This helps him when chasing his prey in the forest, which mainly consists of small rodents such as mice. But he also eats frogs, rabbits, fruit and even earthworms. On farms, foxes are not popular because they also prey on chickens and geese. "Well, good that he is busy jumping...", the chickens are relieved while watching the action from a safe distance. Would you like to try the long jump yourself? Can you make it as far as a squirrel? Or even as far as a hare or fox? Once you have punched the solution letter in box 9, you can con-

tinue to hop, skip and jump to catch up with Lieselotte. She has already gone ahead and got herself into a predicament.

13 Moor - Bog

Lieselotte was a tad careless and has sunk into the marshy ground a bit. What a quagmire! It is not so easy to get out again. How good that the chickens can help. What's up with this ground? Here you find yourself on what is known as an 'upland moor'. These areas are very rare and therefore protected under nature conservation laws. Here only plants that love the wet ground and do not require a lot of nutrients can grow. These include mosses and lichens, cotton grass, sedge and sundew. The peat soil in an upland moor is formed from dead plants and only grows about one millimetre a year. Cows may not graze here, and you should also not leave the path so that the soil is not damaged. The animals that live here have adapted to the barren conditions. These include Alpine newts, grass frogs, dragonflies and marsh grasshoppers. In box 10 you will find a further letter for the solution word.

14 Alphörner - Alphorns

Are you interested in trying to play an alphorn? Carefully place both hands around the alphorn, then blow strongly into the mouthpiece. You will notice that it takes quite a lot of breath, especially if you want to produce higher tones. Alphorns used to be made from spruce trees growing on the hillside, which gave the instruments their bent and slightly crooked shape. The chickens have already gone into hiding from the loud tones. Can you find them? Inspired by the music, you can now punch box 11.

15 Waldspielplatz - Forest playground

What is Lieselotte doing here? Actually she is on vacation! The lumberjacks who felled the trees are pleased by her generous assistance. Lieselotte is in fact a great help when it comes to pulling the thick tree trunks over the narrow forest paths. Cows hauling loads was not unusual in times past. Mostly though, horses used to be harnessed as draught animals in Central Europe. But poorer farmers also used oxen or cows to transport loads. Sometimes small traders would even use dogs to pull smaller loads. In today's forestry it is preferred to use a tractor for carrying the heavy loads over the rough terrain. The road through the mountain forest is challenging and requires a lot of skill. On the forest trail you can practise improving your own skills. A successfully completed course will be rewarded in box 12.

16 Fotopoint - Photo point

Lieselotte has reached the end of her hike. Today she roamed over beautiful meadows, meeting fellow cows and even marmots. And would you like to know what she enjoyed the most? Then check the solution strip on your map... If you separate the strip with the answer and hand it in at the valley station, you are going to receive a gift in return. And what did you like best on the trail? The alphorns? The marmots? Or maybe the cable car? For now, Lieselotte would like to rest a little. After all, new adventures will be waiting for her tomorrow. And maybe also for you...
